

Pricing for Presentation

Label Holders/Label Stands

- Use existing labeling system – no extra costs for pricing system with single digits
- Printing prices instead of plugging – no manual assembly and sorting
- Value added information at the price – Quality feature or company logo next to the product
- Additional currency for the price – Sales advantage in tourism and transit
- Extra space for data – back of price tag for sales information
- Variable in design – change font, size and colour at no extra cost

Presentation has to be changed, but not in the mood for tedious price setting and time-consuming sorting of digits? – Just use your label printing system to create neat price displays for shop windows and showcases.

With the popular labels 44 1072 K1 or 34 870IR K1, you get started right away. After printing, simply cut the loop and slide the folded label into the holder. Now you have a representative price display ready for decoration.

Due to the general cost situation, we can no more keep our prices constant over a longer period of time, but have to permanently adjust them to the supply market. Please find up-to-date prices in our online shop.
